linkedin.com/in/arthvala | github.com/CrewArth

Summary

- Specialized in AI, Computer Vision, and Deep Learning with hands-on experience building real-world AI applications.
- Skilled in Python, TensorFlow and OpenCV, with a focus on creating useful and practical AI solutions.

Education

Parul University, Integrated Master of Computer Applications

June 2021 – April 2025

- CGPA: 8.90/10.0
- Specialization in Artificial Intelligence

Projects

ShapeShift.AI - Transform ideas into 3D Reality

- Developed Web platform that generates 3D models from text and images using advanced AI tools.
- Implemented 3D model customization and export functionality in FBX, OBJ, and GLB formats, and integrated a scalable credit-based monetization system allowing users to generate 5 free models before purchase.
- Deployed Link: shapeshiftai.vercel.app

Cricket Turf Booking System - AI

- Built a highly mobile-optimized web platform that enables users to seamlessly book turf slots online, featuring an automated slot booking system capable of handling 100+ daily reservations with customizable time slots.
- Integrated a QR-based ticketing system to streamline check-ins and improve entry efficiency, while expanding an admin dashboard for real-time slot and turf management with response times under 3 seconds.
- Launched at: turf106.vercel.app/

ClassiVision – Ease Model Training

- Created a browser-based AI web tool enabling non-technical users to create image classification models without prior Machine Learning knowledge, supporting dataset uploads of up to 1,000 images.
- Integrated real-time accuracy tracking to guide users toward achieving more than 85. model accuracy and enabled instant export of trained models in TensorFlow and TFLite formats.
- Published at: classivision.streamlit.app/

Experience

Internshala Student Partner, Internshala

June – July 2024 Online

- Promoted Internshala's training programs and internship opportunities, engaging students through social networks and offline events.
- Assisted students in exploring career options, providing insight on skill-building courses and increase awareness on available internships.

Technologies

Languages: Python, Java, HTML, CSS, JavaScript

Library: TensorFlow, Django, Flask, OpenCV, FastAPI, Pandas, Excel

Database: MongoDB, Firebase, MySQL

Area of Interest: Artificial intelligence, computer vision, deep learning, Python programming, data processing
