

ARTH VALA

Full Stack Developer (MERN) • React.js • Node.js • MongoDB • Next.js

Vadodara, Gujarat | arthvala@gmail.com | +91 9913414224 | linkedin.com/in/arthvala | github.com/CrewArth

Professional Summary

- Aspiring Full-Stack Developer (MERN) with hands-on experience building scalable applications using MongoDB, Express.js, React.js, and Node.js. Strong in REST API development, database design, authentication (JWT).
- Experience applying AI and Computer Vision in full-stack projects, from training models to integrating automation features into web apps.

Skills

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), Responsive UI Design

Backend: Node.js, Express.js, REST APIs, Authentication (JWT, OAuth), Role-Based Access, Error Handling

Databases: MongoDB, MySQL, Firebase

AI / ML: Python, TensorFlow, OpenCV, Pandas & Prompt Engineering

Tools: Git, GitHub, Postman, Jira, Figma

Cloud: AWS

Soft Skills: Problem-Solving, Communication, Team Collaboration, Time Management, Adaptability

Education

Parul University, Integrated Master of Computer Applications (Artificial Intelligence) 2021 – 2025

- CGPA: 8.90/10
- Awarded the Gold Medal for academic excellence in the IMCA 2021–25 program.

Internship

Rishabh Software, Full Stack Engineering Intern Vadodara

- Gained practical experience in the MERN stack, including API development and database handling. July 2025 - Present
- Worked on a real-world MERN project, implementing JWT authentication, role-based access control, and reusable React components integrated with backend APIs.
- Boosted UI responsiveness by 25% through thoughtful state management and component restructuring.

Projects

Guest House Booking System

- Engineered an end-to-end booking platform using React, Node.js, Express and MongoDB, enabling employees to create and track reservations seamlessly.
- Established role-based access, JWT authentication, and a structured approval workflow for secure and controlled operations.
- Enhanced overall process efficiency by 40% by automating request flows and reducing manual coordination by 50%.
- Strengthened system scalability using indexing, pagination, and efficient data-handling techniques for high-volume usage.

ShapeShift.AI - Transform text and image into 3D Reality

- Developed a Generative AI web app that converts text/image prompts into exportable 3D models (FBX / OBJ / GLB).
- Incorporated AI model APIs and deployed a credit-based monetization and tracking mechanism to manage user consumption.
- Accelerated 3D generation time from 1–2 hours to 5–10 minutes by automating workflows and refining pre/post-processing pipelines.

Certifications

- Intel Unnati Industrial Training
- AWS Cloud Practitioner Digital Badge
- Angular JS (Continuing Education Program)
